On the basis of experiments on the simultaneous action of X-rays and of substances specifically enhancing the physiological action of the allotropic modification of oxygen formed in the cell, under the influence of short-wave energy, the conclusion has been reached in this paper that ozone is the chemical mediator of the X-ray (Biological Sciences - Biochemistry, TT, v. 8, no. 2)

A survey of data on the biology of animal's integument indicates that the dynamics of variations in the number of ectoparasites and the dynamics of their activity depend first of all on the nature and the extent of the changes in the microclimate of the surrounding medium (coverings of the host's body).
